

Sticky Notes Extension Documentation

Overview

Sticky is a simple Chrome extension developed by Mr. Khan that allows users to create, edit, and delete sticky notes directly from their browser.

Installation

To install the Sticky extension, follow these steps:

1. Download the extension files from the source (e.g., GitHub repository, download link).
2. Extract the downloaded files to a folder on your computer.
3. Open the Chrome browser on your computer.
4. In the address bar, type `chrome://extensions` and press Enter.
5. Enable the "Developer mode" toggle switch located in the top right corner of the page.
6. Click on the "**Load unpacked**" button.
7. Navigate to the folder where you extracted the extension files and select the folder.
8. Click "**Open**" to install the extension.

Usage

Once the Sticky extension is installed, you can access it by clicking on the extension icon in the Chrome toolbar. This will open the Sticky popup window, where you can perform the following actions:

- **Adding a Note:** Click the "Add Note" button to create a new sticky note. Enter your note text in the text area provided and click "Confirm" to save the note. You can also add multiple notes at the same time.
- **Editing a Note:** To edit an existing note, click the edit (pencil) icon next to the note you want to edit. This will open an edit dialog where you can modify the note text. Click "Confirm" to save your changes or "Cancel" to discard them.
- **Deleting a Note:** To delete a note, click the delete (trash) icon next to the note you want to remove. This will permanently delete the note.

Features

- Simple and intuitive interface for creating and managing sticky notes.
- Automatically saves notes to Chrome sync storage, allowing seamless synchronization across devices.
- Supports basic text formatting using HTML tags (e.g., `
` for line breaks).

Our Goal

The Sticky extension is developed to solve the following problems:

1. **Note-taking Convenience:** Quickly jot down notes without leaving your browser window. Whether it's a reminder, a to-do list, or just a random thought, Sticky makes it easy to capture and organize your ideas.
2. **Persistent Storage:** Your notes are securely stored within your browser's local storage, ensuring that they are accessible whenever you need them. There's no need to worry about losing your notes, even if you close the browser or restart your computer.
3. **Customization and Organization:** Customize the appearance of your notes with different colors and fonts to suit your preferences. Organize your notes by arranging them in any order you like or grouping them by category.

Data storage and privacy

The Sticky extension stores your notes locally on the computer you are using. The developer of the extension does not have access to your data. Your notes are stored securely within your browser's storage and are not shared with any external servers or third parties.

Feedback and Support

If you encounter any issues or have suggestions for improving the Sticky extension, please contact us at wasikurrahmankhan29@gmail.com
